

**MISSION, VISION, VALUES, STRATEGIC OBJECTIVES AND POLICY IN THE
FIELD OF QUALITY, ENVIRONMENT, OCCUPATIONAL HEALTH AND
SAFETY, INFORMATION SECURITY**

Vision

Our organization has understood that technology is in a process of exponential evolution, and customer requirements are changing in line with this. Consequently, we aim to be one step ahead of market requirements, to understand the main factors that require change, in order to be able to easily adapt and to perform on the market.

Our vision is that of a company in which our specialists work closely with customers to better understand their requirements, to provide better and better services and to always be considered a reliable partner.

Mission

Our mission is to become a market leader by promoting high performance services and solutions, adapted to the needs of each client and provided competitively.

Values

Quality. The top quality of services and products is the most important goal of our organization - all the solutions offered starting from this requirement.

Pragmatism. We provide exactly the services and equipment necessary for the client, we think of efficient and sustainable solutions over time.

Partnership. We believe in mutual success - as a rule of business success. Therefore, we aim to gain the trust of customers for long-term collaborations.

Innovation. We have a permanent concern to offer solutions and technologies that always do more for the client, allowing them to outperform their competition.

Flexibility. We know that every business is different - consequently, we adapt the services and equipment to the needs of each client.

Development. We are constantly looking to grow, as an organization and as its specialists. Knowledge is what makes us valuable.

Strategic objectives

- The continuous increase of the market share held by the company.
- Permanent provision of top technical solutions, in accordance with the evolution of technology.
- Development and protection of organizational know-how.
- Optimization of resource consumption.
- Ensuring an optimal professional climate, to stimulate the performance of the company's employees and to avoid incidents & work accidents.
- Alignment with the principles of sustainable development, prevention of climate change, ecosystem degradation and biodiversity loss.
